What are the most significant barriers or challenges your program is currently facing (e.g., enrollment, faculty resources, student support, accreditation requirements)?

*Responses will not be used to evaluate or penalize program. The information collected is for the purpose of informing broader understanding, identifying trends, and guiding future policy.*

Shrinkage in our face-to-face extended campuses. The upside is significant growth in our online programming.

What successes or available resources have contributed most to your program's growth, effectiveness, or ability to support students?

*Responses will not be used to evaluate or penalize program.*

*The information collected is for the purpose of informing broader understanding, identifying trends, and guiding future policy.*

Significant growth in our online programming with an ongoing robust enrollment. We also are seeing strong graduation rates, particularly in the CES program. We have an incredibly strong faculty who are very supportive of student needs.

What is CACREP doing well for your program that you appreciate?

Creates a clear structure and framework of expectations for supporting our students and ensuring quality across the program.

What would you like to see CACREP do differently in its current services?

Greater consistency in the interpretation of standards and how those interpretations impact programs, there's quite a bit of variability in the perceptions of team members, board members, and staff in KCREP, which can create ambiguity and uncertainty for programs.

What services or resources would you like to see CACREP add or develop that would better serve you and your program?

KCREP has done a great job of building out greater clarity around its expectations through supporting documents and clear document templates. I think that additional fine-tuning of the AMF system, as some areas within that system seem like they're still being thought through, would be helpful.
